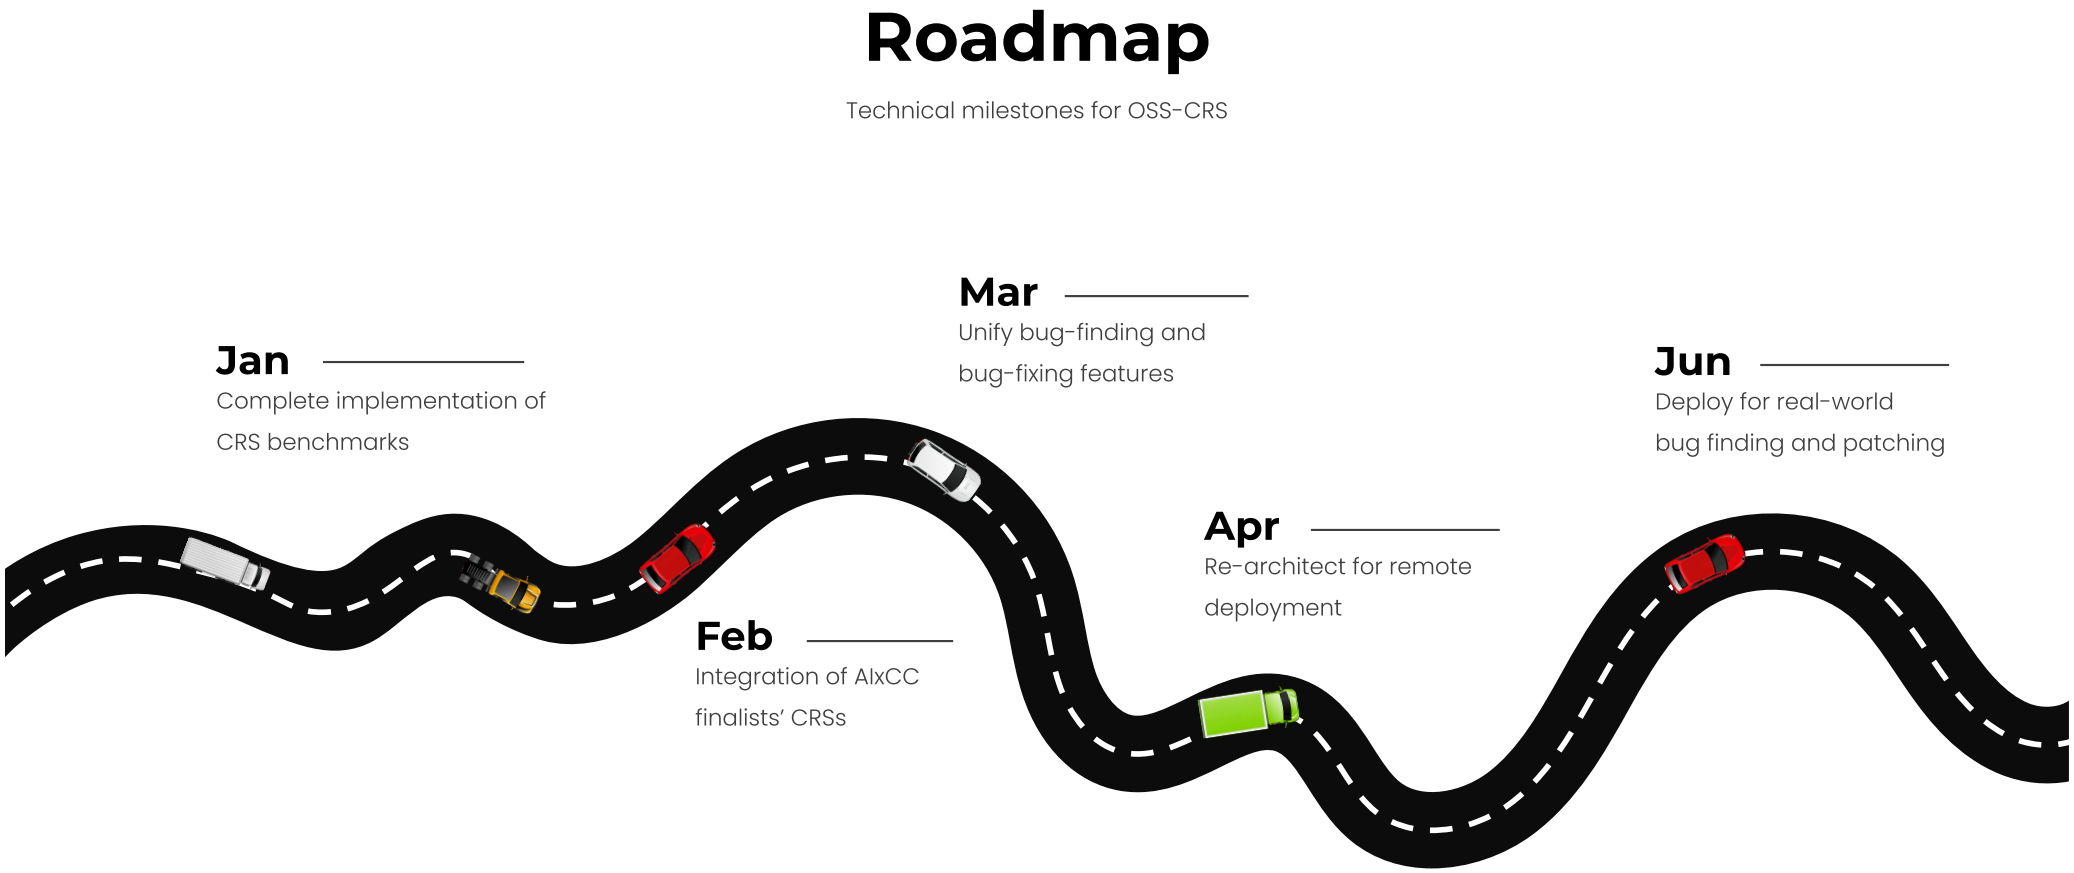
Meeting Notes

OpenSSF Cyber Reasoning Systems Special Interest Group

Agenda

1. Roadmap
2. Community Contributions
3. Atlantis-Java

Roadmap (from 01/12 meeting)



Roadmap

- [x] Complete implementation of CRS benchmarks: **CRSBench project currently undergoing experiments**
- [x] Unify bug-finding and bug-fixing features: **Complete as of #162 (builder-sidecar)**
- [x] Integration of AIxCC finalists' CRSs: **All AFC bug-finding CRSs integrated**
- [ ] Re-architect for remote deployment: **development blocked on Azure account provisioned by GT**
- [ ] Deploy for real-world bug finding and patching

Required Items for Deployment

- **Triaging**: Add new CRS type to OSS-CRS pipeline
  - Clusterfuzz crash deduplication
  - Triagers from AIxCC CRSs
  - agentic triaging and report generation
- **Target Projects**: Selected suite of OSS projects that we run our CRSs against

Atlantis-Java

Check out the blog and paper below to learn more about agentic sinkpoint-fuzzing and the performance of open weight LLMs!

Atlantis-Java is updated and remains accessible through OSS-CRS

- Team-Atlanta Blog: SinkFuzz GLM
- GONDAR arXiv paper

Community Contributions

- #159 : Warn users if resource config conflicts with machine resources (@tkqdldk)
- #168 : Docker Compose secrets for LLM keys (@tusharshah21)
- #171 : patchsense-crs semantic patch validator to registry (@aaronsrhodes)

Q&A / Discussion

Refer to Cyber Reasoning Systems bi-weekly meeting notes.
